

IMPORTANT INFORMATION ABOUT YOUR DRINKING WATER

Monitoring Requirements Not Met for:

ISABELLA COUNTY WATER SUPPLY SYSTEM No. 1 (LAKE ISABELLA) WSSN: 03435

We are required to monitor your drinking water for specific contaminants on a regular basis. Results of regular monitoring are an indicator of whether or not our drinking water meets health standards. We did not collect the required number of routine samples for total coliform for the month of March 2005 and, therefore, cannot be sure of the quality of our drinking water during that time.

What should I do? There is nothing you need to do at this time. This is not an emergency. You do not need to boil water or use an alternative source of water at this time. The table below lists the contaminant we did not properly test for and how often we are supposed to test for this contaminant, how many samples we are supposed to collect, how many samples we took, when samples should have been taken, and the date on which follow up samples were or will be taken.

Contaminant	Required Sampling Frequency	Number of samples taken	When all samples should have been taken.	When samples were or will be taken.
Total Coliform	1 per month	None	March 1, 2005 through March 31, 2005	1 sample per Month.

What happened? What is being done? The facility is taking steps to assure monitoring will be provided as required in the future.

For more information, please contact Mr. Timothy A. Warner at (989) 772-0911, ext. 222.

Please share this information with all other people who drink this water. You can do this by posting this notice in a public place or distributing copies by hand or mail.

The public water system indicated above hereby affirms that public notice has been provided to consumers in accordance with the delivery, content, and format requirements and deadlines in the Public Notification Regulation for Public Water Systems, 40 CFR Part 141.32 of subpart Q.
