

Soil Erosion & Stormwater Control Plan

for Residential Construction Sites

Instructions:

1. Complete this plan by filling in requested information, completing the site diagram and mark(✓) appropriate boxes on the back of this form. See examples in Soil and Storm Water Control for CleanWater in Northern Michigan.
2. When completing the site diagram, give consideration to potential erosion that may occur before, during, and after grading. Water runoff patterns can change significantly as a site is reshaped.
