Project Description

This request is for equipment of critical need for the Emergency Operations Center (EOC). The EOC is the primary location for emergency support to our community and supports planned and unplanned events. In the past 12 months, the EOC has been put to the test with real-world responses to two major incidents with the June 2017 State of Michigan Flooding incident and the March 2nd, 2018 Central Michigan University Shooting Incident.

The June 2017 State of Michigan Flooding incident affected almost every public safety organization and government that serves the communities within Isabella County. From the lifesaving response and rescues of kayakers on the Chippewa River to the deployment of volunteers and first responders for damage assessments, everything was coordinated through the EOC.

Recently, the unfortunate shooting incident that occurred on the campus of Central Michigan University affected many of the citizens, residents, businesses, schools, and visitors in our community. Law enforcement officers from departments and agencies from inside and outside our county answered the call for help. Helicopters, tracking dogs, and SWAT team members assisted with the response efforts. Both incidents have taught us that it is not a matter of if an incident will occur, but when. This emergency response support equipment is a critical need. It needs to be ready before the next incident strikes our community. During these events, we at the EOC learned that with the addition of some specific equipment future responses will be improved.

Please see attached documents for equipment details. The equipment is basic in nature, 7 Large Screen Computer TV Monitors, 6 Laptops and 1 desktop computer with outputs to project on the large screen monitors, 2 printers, telephone handsets, other support materials (cabling/ mounts/ cable channels) and installation.

Benefit Description

Nearly all government agencies in Isabella county have been touched by a disaster; and every single government has been touched by an emergency that required its citizens, residents, or visitors to call to 911. Almost every 911 call has the potential to build up into a larger scaled multi-agency response. The Isabella County Emergency Management and 911 Center serves all of the people and public safety departments within all of the governmental jurisdiction's, 365 days a year, 24 hours per day with honor and respect to the best of our ability.

Funding Requirements

No long-term funding is required. The intention will be to build the replacement of this equipment into future budgets using a normal equipment replacement maintenance schedule.

Project Timeline

It is anticipated that this project can be completed within 90 days of receiving funding.
